fetch('content', 'object')

The fetch function object of the content module: 2 parameter(s), 0 required.

Source file: doc/eng-us/examples/fetch-functions/content/object.md Last changed 2026-11-04
https://doc.exponential.earth/exphelp/viewer/examples/fetch-functions/content/object.md

Defined in `kernel/content/function_definition.php`; it calls `eZContentFunctionCollection::fetchContentObject()` (`kernel/content/ezcontentfunctioncollection.php`). Operation type: read.

Parameters

Parameter	Type	Required	Default
object_id	integer	no	false
remote_id	string	no	false

Example

In a template (the values are placeholders of each parameter's type):

Template

```
{def $result = fetch( 'content', 'object', hash( 'object_id', 1 ) )}
{* with every parameter *}
{def $all = fetch( 'content', 'object', hash( 'object_id', 1,
                                              'remote_id', 'remote_id' ) )}
```

In PHP, the same function through the function handler (`lib/ezutils/classes/ezfunctionhandler.php`):

PHP

```
$result = eZFunctionHandler::execute( 'content', 'object', array( 'object_id' => 1 ) );
```

In a shipped template

The first use in the templates of this installation, `design/admin/templates/content/trash.tpl` line 208:

Template

```
<dd>{if $item.owner_name}<a href={concat( '/content/view/full/', fetch( 'content', 'object', hash
( 'object_id', $item.owner_id ) ).main_node_id )|ezurl} dir="auto">{$item.owner_name|wash}</a>{el
se}{'Unknown'|i18n( 'design/admin/content/trash' )}{/if}</dd>
```
