browse.ini [AddRelatedObjectListToDataType]

The settings of [AddRelatedObjectListToDataType] in browse.ini: StartNode, SelectionType, ReturnType

Source file: `doc/eng-us/examples/ini-settings/browse/AddRelatedObjectListToDataType.md` Last changed 2026-11-04
https://doc.exponential.earth/exphelp/viewer/examples/ini-settings/browse/AddRelatedObjectListToDataType.md

The block `[AddRelatedObjectListToDataType]` of `settings/browse.ini`, with 3 setting(s).

> Action for finding objects to related object list datatype

Never edit `settings/browse.ini` itself: an update replaces it. Put the settings you change in an override, which wins over the shipped file:

- `settings/override/browse.ini.append.php` for every siteaccess,
- `settings/siteaccess/<siteaccess>/browse.ini.append.php` for one siteaccess,
- `extension/<extension>/settings/browse.ini.append.php` in an extension (read when the extension is active).

StartNode

Default: `content`.

INI

```ini
<?php /* #?ini charset="utf-8"?
# settings/override/browse.ini.append.php
[AddRelatedObjectListToDataType]
StartNode=content
*/ ?>
```

SelectionType

Default: `multiple`.

INI

```ini
<?php /* #?ini charset="utf-8"?
# settings/override/browse.ini.append.php
[AddRelatedObjectListToDataType]
SelectionType=multiple
*/ ?>
```

ReturnType

Default: `ObjectID`.

INI

```ini
<?php /* #?ini charset="utf-8"?
# settings/override/browse.ini.append.php
[AddRelatedObjectListToDataType]
ReturnType=ObjectID
*/ ?>
```
