# rest.ini [expHelpRestController_CacheSettings]

The settings of [expHelpRestController_CacheSettings] in rest.ini: ApplicationCache

Source file: `doc/eng-us/examples/ini-settings/rest/expHelpRestController_CacheSettings.md` Last changed 2026-11-04
https://doc.exponential.earth/exphelp/viewer/examples/ini-settings/rest/expHelpRestController_CacheSettings.md

The block `[expHelpRestController_CacheSettings]` of `settings/rest.ini`, with 1 setting(s).

> The context help of the help provider is never cached: what a user may see depends on the user

Never edit `settings/rest.ini` itself: an update replaces it. Put the settings you change in an override, which wins over the shipped file:

- `settings/override/rest.ini.append.php` for every siteaccess,
- `settings/siteaccess/<siteaccess>/rest.ini.append.php` for one siteaccess,
- `extension/<extension>/settings/rest.ini.append.php` in an extension (read when the extension is active).

## ApplicationCache

Default: `disabled`.

**INI**

```
<?php /* #?ini charset="utf-8"?
# settings/override/rest.ini.append.php
[expHelpRestController_CacheSettings]
ApplicationCache=disabled
*/ ?>
```
