/audit/export

The view audit/export: its address, parameters and the policy functions it needs.

Source file: doc/eng-us/examples/module-views/audit/export.md Last changed 2026-11-04
https://doc.exponential.earth/exphelp/viewer/examples/module-views/audit/export.md

A view of the audit module, defined in kernel/audit/module.php and run by kernel/audit/export.php.

Address

```
/audit/export/(channel)/<Channel>/(name)/<Name>/(user)/<User>/(login)/<Login>/(object)/<Object>/(target)/<Target>/(result)/<Result>/(severity)/<Severity>/(request)/<Request>/(job)/<Job>/(run)/<Run>/(ip)/<IP>/(from)/<From>/(to)/<To>/(q)/<Q>/(legacy_file)/<LegacyFile>/(parent)/<Parent>/(offset)/<Offset>/(limit)/<Limit>/(format)/<Format>/(download)/<Download>
```

Unordered parameters, in any order as /(name)/value: (channel) sets Channel, (name) sets Name, (user) sets User, (login) sets Login, (object) sets Object, (target) sets Target, (result) sets Result, (severity) sets Severity, (request) sets Request, (job) sets Job, (run) sets Run, (ip) sets IP, (from) sets From, (to) sets To, (q) sets Q, (legacy_file) sets LegacyFile, (parent) sets Parent, (offset) sets Offset, (limit) sets Limit, (format) sets Format, (download) sets Download.

Who may open it

The user needs this policy function:

- audit/read

A policy on audit/* (every function) also grants it; limitations of the policy (section, subtree, class ...) still apply where the view checks them.

Details

Key	Value
Navigation part	expauditnavigationpart

Example

A link in a template (ezurl adds the siteaccess and quotes the address); the parameter values are placeholders:

Template

```
<a href={'/audit/export'|ezurl}>audit/export</a>
<a href={concat( '/audit/export/(channel)/', 1 )|ezurl}>audit/export</a>
```

From PHP, the redirect a view gives after it has done its work:

PHP

```php
return $Module->redirectTo( '/audit/export' );
```
