/class/edit

The view class/edit: its address, parameters and the policy functions it needs.

Source file: doc/eng-us/examples/module-views/class/edit.md Last changed 2026-11-04
https://doc.exponential.earth/exphelp/viewer/examples/module-views/class/edit.md

A view of the `class` module, defined in `kernel/class/module.php` and run by `kernel/class/edit.php`.

Address

```
/class/edit/<ClassID>/<GroupID>/<GroupName>/(language)/<Language>
```

Ordered parameters, in this order after the view name: `ClassID`, `GroupID`, `GroupName`.

Unordered parameters, in any order as `/(name)/value`: `(language)` sets `Language`.

Who may open it

The view names no policy function, so the user needs a policy for the whole module: `class/*` (every function of the module) in one of the roles assigned to them.

Details

Key	Value
Navigation part	ezsetupnavigationpart
UI context	edit

Example

A link in a template (`ezurl` adds the siteaccess and quotes the address); the parameter values are placeholders:

Template

```
<a href={'/class/edit/1/1/groupname'|ezurl}>class/edit</a>
<a href={concat( '/class/edit/1/1/groupname/(language)/', 1 )|ezurl}>class/edit</a>
```

From PHP, the redirect a view gives after it has done its work:

PHP

```
return $Module->redirectTo( '/class/edit/1/1/groupname' );
```
