/expimageeditor/save

The view expimageeditor/save: its address, parameters and the policy functions it needs.

Source file: doc/eng-us/examples/module-views/expimageeditor/save.md Last changed 2026-11-04
https://doc.exponential.earth/exphelp/viewer/examples/module-views/expimageeditor/save.md

A view of the `expimageeditor` module, defined in `extension/expimageeditor/modules/expimageeditor/module.php` and run by `extension/expimageeditor/modules/expimageeditor/save.php`.

Address

```
/expimageeditor/save/<attribute_id>/<version>
```

Ordered parameters, in this order after the view name: `attribute_id`, `version`.

Who may open it

The user needs this policy function:

- `expimageeditor/edit`

A policy on `expimageeditor/*` (every function) also grants it; limitations of the policy (section, subtree, class ...) still apply where the view checks them.

Example

A link in a template (`ezurl` adds the siteaccess and quotes the address); the parameter values are placeholders:

Template

```
<a href={'/expimageeditor/save/attribute-id/version'|ezurl}>expimageeditor/save</a>
```

From PHP, the redirect a view gives after it has done its work:

PHP

```
return $Module->redirectTo( '/expimageeditor/save/attribute-id/version' );
```
