/layout/set

The view layout/set: its address, parameters and the policy functions it needs.

Source file: `doc/eng-us/examples/module-views/layout/set.md` Last changed 2026-11-04
https://doc.exponential.earth/exphelp/viewer/examples/module-views/layout/set.md

A view of the `layout` module, defined in `kernel/layout/module.php` and run by `kernel/layout/set.php`.

Address

```
/layout/set/<LayoutStyle>
```

Ordered parameters, in this order after the view name: `LayoutStyle`.

Who may open it

Listed in `settings/site.ini [RoleSettings] PolicyOmitList[]`: no policy is checked, everyone may open it. The view names no policy function, so the user needs a policy for the whole module: `layout/*` (every function of the module) in one of the roles assigned to them.

Example

A link in a template (`ezurl` adds the siteaccess and quotes the address); the parameter values are placeholders:

Template

```
<a href={'/layout/set/layoutstyle'|ezurl}>layout/set</a>
```

From PHP, the redirect a view gives after it has done its work:

PHP

```
return $Module->redirectTo( '/layout/set/layoutstyle' );
```
