/migration/remote

The view migration/remote: its address, parameters and the policy functions it needs.

Source file: doc/eng-us/examples/module-views/migration/remote.md Last changed 2026-11-04
https://doc.exponential.earth/exphelp/viewer/examples/module-views/migration/remote.md

A view of the `migration` module, defined in `kernel/migration/module.php` and run by `kernel/migration/remote.php`.

Address

```
/migration/remote/<RemoteID>
```

Ordered parameters, in this order after the view name: `RemoteID`.

Who may open it

The user needs this policy function:

- `migration/remotes`

A policy on `migration/*` (every function) also grants it; limitations of the policy (section, subtree, class ...) still apply where the view checks them.

Details

Key	Value
Navigation part	`ezsetupnavigationpart`
Single POST actions	ReviewButton: Review, SaveButton: Save, EditButton: Edit, TestButton: Test, RemoveButton: Remove

Example

A link in a template (`ezurl` adds the siteaccess and quotes the address); the parameter values are placeholders:

Template

```
<a href={'/migration/remote/1'|ezurl}>migration/remote</a>
```

From PHP, the redirect a view gives after it has done its work:

PHP

```
return $Module->redirectTo( '/migration/remote/1' );
```
