/migration/stream

The view migration/stream: its address, parameters and the policy functions it needs.

Source file: doc/eng-us/examples/module-views/migration/stream.md Last changed 2026-11-04
https://doc.exponential.earth/exphelp/viewer/examples/module-views/migration/stream.md

A view of the `migration` module, defined in `kernel/migration/module.php` and run by `kernel/migration/stream.php`.

Address

```
/migration/stream/<RunID>/(offset)/<Offset>/(log)/<LogOffset>
```

Ordered parameters, in this order after the view name: `RunID`.

Unordered parameters, in any order as `/(name)/value`: `(offset)` sets `Offset`, `(log)` sets `LogOffset`.

Who may open it

The user needs this policy function:

- `migration/read`

A policy on `migration/*` (every function) also grants it; limitations of the policy (section, subtree, class ...) still apply where the view checks them.

Details

Key	Value
Navigation part	ezsetupnavigationpart

Example

A link in a template (`ezurl` adds the siteaccess and quotes the address); the parameter values are placeholders:

Template

```
<a href={'/migration/stream/1'|ezurl}>migration/stream</a>
<a href={concat( '/migration/stream/1/(offset)/', 1 )|ezurl}>migration/stream</a>
```

From PHP, the redirect a view gives after it has done its work:

PHP

```
return $Module->redirectTo( '/migration/stream/1' );
```
