/notification/settings

The view notification/settings: its address, parameters and the policy functions it needs.

Source file: `doc/eng-us/examples/module-views/notification/settings.md` Last changed 2026-11-04
https://doc.exponential.earth/exphelp/viewer/examples/module-views/notification/settings.md

A view of the `notification` module, defined in `kernel/notification/module.php` and run by `kernel/notification/settings.php`.

Address

```
/notification/settings/(offset)/<Offset>/(q)/<Query>/(class)/<ClassFilter>
```

Unordered parameters, in any order as `/(name)/value`: `(offset)` sets `Offset`, `(q)` sets `Query`, `(class)` sets `ClassFilter`.

Who may open it

The user needs this policy function:

- `notification/use`

A policy on `notification/*` (every function) also grants it; limitations of the policy (section, subtree, class ...) still apply where the view checks them.

Details

Key	Value
Navigation part	`ezmynavigationpart`
UI context	`administration`

Example

A link in a template (`ezurl` adds the siteaccess and quotes the address); the parameter values are placeholders:

Template

```
<a href={'/notification/settings'|ezurl}>notification/settings</a>
<a href={concat( '/notification/settings/(offset)/', 1 )|ezurl}>notification/settings</a>
```

From PHP, the redirect a view gives after it has done its work:

PHP

```
return $Module->redirectTo( '/notification/settings' );
```
