/section/list

The view section/list: its address, parameters and the policy functions it needs.

Source file: doc/eng-us/examples/module-views/section/list.md Last changed 2026-11-04
https://doc.exponential.earth/exphelp/viewer/examples/module-views/section/list.md

A view of the `section` module, defined in `kernel/section/module.php` and run by `kernel/section/list.php`.

Address

```
/section/list/(offset)/<Offset>
```

Unordered parameters, in any order as `/(name)/value`: `(offset)` sets `Offset`.

Who may open it

The user needs this policy function:

- `section/view` or `section/edit` or `section/assign`

A policy on `section/*` (every function) also grants it; limitations of the policy (section, subtree, class ...) still apply where the view checks them.

Details

Key	Value
Navigation part	ezsetupnavigationpart

Example

A link in a template (`ezurl` adds the siteaccess and quotes the address); the parameter values are placeholders:

Template

```
<a href={'/section/list'|ezurl}>section/list</a>
<a href={concat( '/section/list/(offset)/', 1 )|ezurl}>section/list</a>
```

From PHP, the redirect a view gives after it has done its work:

PHP

```
return $Module->redirectTo( '/section/list' );
```
