# /setup/cache

The view setup/cache: its address, parameters and the policy functions it needs.

Source file: doc/eng-us/examples/module-views/setup/cache.md Last changed 2026-11-04
https://doc.exponential.earth/exphelp/viewer/examples/module-views/setup/cache.md

A view of the `setup` module, defined in `kernel/setup/module.php` and run by `kernel/setup/cache.php`.

## Address

```
/setup/cache
```

## Who may open it

The user needs this policy function:

- `setup/managecache`

A policy on `setup/*` (every function) also grants it; limitations of the policy (section, subtree, class ...) still apply where the view checks them.

## Details

| Key | Value |
|---|---|
| Navigation part | `ezsetupnavigationpart` |
| UI context | `administration` |
| Single POST actions | ClearCacheButton: ClearCache, ClearAllCacheButton: ClearAllCache, ClearContentCacheButton: ClearContentCache, ClearINICacheButton: ClearINICache, ClearTemplateCacheButton: ClearTemplateCache, RegenerateStaticCacheButton: RegenerateStaticCache, ClearQueryCacheButton: ClearQueryCache, ClearHttpCacheButton: ClearHttpCache, ResetOPcacheButton: ResetOPcache, ClearAPCuButton: ClearAPCu |
| POST action parameters | ClearCache (CacheList: CacheList), RegenerateStaticCache (StaticCacheSiteAccess: StaticCacheSiteAccess) |

## Example

A link in a template (`ezurl` adds the siteaccess and quotes the address); the parameter values are placeholders:

**Template**

```
<a href={'/setup/cache'|ezurl}>setup/cache</a>
```

From PHP, the redirect a view gives after it has done its work:

PHP

```php
return $Module->redirectTo( '/setup/cache' );
```
