/setup/logsdigest

The view setup/logsdigest: its address, parameters and the policy functions it needs.

Source file: doc/eng-us/examples/module-views/setup/logsdigest.md Last changed 2026-11-04
https://doc.exponential.earth/exphelp/viewer/examples/module-views/setup/logsdigest.md

A view of the `setup` module, defined in `kernel/setup/module.php` and run by `kernel/setup/logsdigest.php`.

Address

```
/setup/logsdigest/<Key>/(hours)/<hours>/(known)/<known>
```

Ordered parameters, in this order after the view name: `Key`.

Unordered parameters, in any order as `/(name)/value`: `(hours)` sets `hours`, `(known)` sets `known`.

Who may open it

The user needs this policy function:

- `setup/logs`

A policy on `setup/*` (every function) also grants it; limitations of the policy (section, subtree, class ...) still apply where the view checks them.

Details

Key	Value
Navigation part	`ezsetupnavigationpart`
UI context	`administration`

Example

A link in a template (`ezurl` adds the siteaccess and quotes the address); the parameter values are placeholders:

Template

```
<a href={'/setup/logsdigest/key'|ezurl}>setup/logsdigest</a>
<a href={concat( '/setup/logsdigest/key/(hours)/', 1 )|ezurl}>setup/logsdigest</a>
```

From PHP, the redirect a view gives after it has done its work:

PHP

```
return $Module->redirectTo( '/setup/logsdigest/key' );
```
