/user/edit

The view user/edit: its address, parameters and the policy functions it needs.

Source file: doc/eng-us/examples/module-views/user/edit.md Last changed 2026-11-04
https://doc.exponential.earth/exphelp/viewer/examples/module-views/user/edit.md

A view of the `user` module, defined in `kernel/user/module.php` and run by `kernel/user/edit.php`.

Address

```
/user/edit/<UserID>
```

Ordered parameters, in this order after the view name: `UserID`.

Who may open it

The user needs this policy function:

- `user/login`

A policy on `user/*` (every function) also grants it; limitations of the policy (section, subtree, class ...) still apply where the view checks them.

Details

Key	Value
UI context	edit
Single POST actions	ChangePasswordButton: ChangePassword, ChangeSettingButton: ChangeSetting, CancelButton: Cancel, EditButton: Edit

Example

A link in a template (`ezurl` adds the siteaccess and quotes the address); the parameter values are placeholders:

Template

```
<a href={'/user/edit/1'|ezurl}>user/edit</a>
```

From PHP, the redirect a view gives after it has done its work:

PHP

```
return $Module->redirectTo( '/user/edit/1' );
```
