# /user/password

The view user/password: its address, parameters and the policy functions it needs.

Source file: doc/eng-us/examples/module-views/user/password.md Last changed 2026-11-04
https://doc.exponential.earth/exphelp/viewer/examples/module-views/user/password.md

A view of the `user` module, defined in `kernel/user/module.php` and run by `kernel/user/password.php`.

## Address

```
/user/password/<UserID>
```

Ordered parameters, in this order after the view name: `UserID`.

## Who may open it

The user needs this policy function:

- `user/password`

A policy on `user/*` (every function) also grants it; limitations of the policy (section, subtree, class ...) still apply where the view checks them.

## Details

| Key | Value |
|---|---|
| Navigation part | `ezmynavigationpart` |
| UI context | `administration` |

## Example

A link in a template (`ezurl` adds the siteaccess and quotes the address); the parameter values are placeholders:

**Template**

```
<a href={'/user/password/1'|ezurl}>user/password</a>
```

From PHP, the redirect a view gives after it has done its work:

**PHP**

```
return $Module->redirectTo( '/user/password/1' );
```
