/visual/templateedit

The view visual/templateedit: its address, parameters and the policy functions it needs.

Source file: doc/eng-us/examples/module-views/visual/templateedit.md Last changed 2026-11-04
https://doc.exponential.earth/exphelp/viewer/examples/module-views/visual/templateedit.md

A view of the `visual` module, defined in `kernel/visual/module.php` and run by `kernel/visual/templateedit.php`.

Address

```
/visual/templateedit/(siteAccess)/<SiteAccess>
```

Unordered parameters, in any order as `/(name)/value`: `(siteAccess)` sets `SiteAccess`.

Who may open it

The view names no policy function, so the user needs a policy for the whole module: `visual/*` (every function of the module) in one of the roles assigned to them.

Details

Key	Value
Navigation part	ezvisualnavigationpart
Single POST actions	SaveButton: Save, DiscardButton: Discard

Example

A link in a template (`ezurl` adds the siteaccess and quotes the address); the parameter values are placeholders:

Template

```
<a href={'/visual/templateedit'|ezurl}>visual/templateedit</a>
<a href={concat( '/visual/templateedit/(siteAccess)/', 1 )|ezurl}>visual/templateedit</a>
```

From PHP, the redirect a view gives after it has done its work:

PHP

```
return $Module->redirectTo( '/visual/templateedit' );
```
