FAQ for ezjscore 1.x
====================

Q: I used the ezcss_require()/ezscript_require() template operator in my code but no css/js fi
les are included in my html page
A: You need to put the ezcss_load()/ezscript_load() template operator in your pagelayout templ
ate.
   For an example, see the templates provided in the extension in design/ezwebin/templates/* t
hat does this automatically for ezwebin (+ezflow).
```
