git_manager (git dashboard and backups): release notes

Source file: doc/changelogs/extensions/git_manager.md Last changed 2026-11-04
https://doc.exponential.earth/learninminutes/exphelp/viewer/changelogs/extensions/git_manager.md

Read this page before you install or update `git_manager`, or to find out which release brought a change.

What each release of `git_manager` contains, assembled from its commits. Each line links its commit. Version bumps, merge commits and funding or package metadata that deliver nothing to a user are counted, not listed. The extension is described on its feature page; the story is in the chronicle.

v2.0.14 (2026-10-02)

Added

- The dashboard's Upstream card shows where the installation stands against its branch on origin (8bd3c14)

1 version, merge or metadata commit not listed.

v2.0.13 (2026-10-02)

Updated

- The commands start through the shared command helpers (dee7143)

1 version, merge or metadata commit not listed.

v2.0.12 (2026-10-02)

Updated

- The command line scripts, cronjob parts and module views are classes the files call (3a3b464)

1 version, merge or metadata commit not listed.

v2.0.11 (2026-09-29)

Updated

- The top menu tab, its tooltip and the Setup menu entries have German translations (07b92e5)

1 version, merge or metadata commit not listed.

v2.0.10 (2026-09-29)

1 version, merge or metadata commit not listed.

v2.0.9 (2026-09-29)

Updated

- The "Add a submodule" section is folded by default and remembers whether it was opened (`e2df984`)

1 version, merge or metadata commit not listed.

v2.0.8 (2026-09-29)

Added

- List, add, edit, update and remove submodules, in the dashboard and on the command line (`a018d42`)

Updated

- Fixed: Branch names and commit hashes reach git only when valid and quoted (`4fb2587`)
- Fixed: Backups are their owner's only, and the database password is never on a command line (`9a8c6c9`)
- Fixed: The AGPL dump leaves out every table with secrets or personal data, and keeps remote_ids (`25dfaf0`)
- Fixed: The backup page escapes descriptions, timestamps, file names and messages (`2c30f91`)
- backup-create.php takes the passphrase from a file, the environment or a hidden prompt (`36a5df4`)

1 version, merge or metadata commit not listed.

v2.0.7 (2026-09-28)

Added

- Add, edit, rename and remove remotes, in the dashboard and on the command line (`956839a`)

Updated

- The commit log is folded by default and shows what is not pushed yet (`1c0b45a`)

1 version, merge or metadata commit not listed.

v2.0.6 (2026-09-28)

Added

- Push to a remote from the dashboard, never forced, behind a policy of its own (`f00b7eb`)

Updated

- The backup page loads no external stylesheet or script (f671c23)

1 version, merge or metadata commit not listed.

v2.0.5 (2026-09-28)

Updated

- Fixed: The commit log filter is quoted for the shell (ac672ab)
- The dashboard and commit details are redesigned, with every action and field name kept (676184e)

1 version, merge or metadata commit not listed.

v2.0.4 (2026-09-28)

Added

- bin/php/upgrade-policy-dump-to-backup.php renames the role policies git_manager/dump to git_manager/backup (d1ccf54)

Renamed

- The backup view git_manager/dump to git_manager/backup, its policy function dump to backup, and the Setup menu link Dump assets to Backup (06cdbdc) Upgrade note.

1 version, merge or metadata commit not listed.

v2.0.3 (2026-09-28)

Updated

- Every visible text of the extension is a translation string, with German (606296e)

1 version, merge or metadata commit not listed.

v2.0.2 (2026-09-27)

Updated

- Update project name from Exponential to Exponential / Exponential (3b8a634)
- Updated ezinfo.php and extension.xml version file. Doc. (5022a7c)
- The extension names its license as GNU General Public License v2.0 (or any later version), in version 2.0.2 (2cac461)

v2.0.1 (2026-06-21)

Added

- Add Complete Backup Manager System with AGPL-Compatible Releases and License Bundling (c30a9ca)

Updated

- Added extension documentation, license, composer support and extension.xml and

sponsorship info (`f8b6a50`)

- Refined composer.json syntax (`bc1ad40`)

2 version, merge or metadata commits not listed.
