fetch('content', 'class_list')

The fetch function class_list of the content module: 4 parameter(s), 0 required.

Source file: doc/eng-us/examples/fetch-functions/content/class_list.md Last changed 2026-11-04
https://doc.exponential.earth/learninminutes/exphelp/viewer/examples/fetch-functions/content/class_list.md

Defined in `kernel/content/function_definition.php`; it calls `eZContentFunctionCollection::fetchClassList()` (`kernel/content/ezcontentfunctioncollection.php`). Operation type: read.

Parameters

Parameter	Type	Required	Default
as_object	bool	no	true
group_list	array	no	false
sorts	array	no	null
limit	array	no	null

Example

In a template (the values are placeholders of each parameter's type):

Template

```
{def $result = fetch( 'content', 'class_list', hash( 'as_object', true() ) )}
{* with every parameter *}
{def $all = fetch( 'content', 'class_list', hash( 'as_object', true(),
                                                  'group_list', array(),
                                                  'sorts', array(),
                                                  'limit', array() ) )}
```

In PHP, the same function through the function handler (`lib/ezutils/classes/ezfunctionhandler.php`):

PHP

```
$result = eZFunctionHandler::execute( 'content', 'class_list', array( 'as_object' => true ) );
```

In a shipped template

The first use in the templates of this installation, `design/admin/templates/visual/templatecreate.tpl` line 110:

Template

```
{section name=Class loop=fetch('content', 'class_list', hash('sorts', array()))}
```
