fetch('content', 'related_objects_ids')

The fetch function related_objects_ids of the content module: 3 parameter(s), 1 required.

Source file: doc/eng-us/examples/fetch-functions/content/related_objects_ids.md Last changed 2026-11-04
https://doc.exponential.earth/learninminutes/exphelp/viewer/examples/fetch-functions/content/related_objects_ids.md

Defined in `kernel/content/function_definition.php`; it calls `eZContentFunctionCollection::fetchRelatedObjectsID()` (`kernel/content/ezcontentfunctioncollection.php`). Operation type: read.

Parameters

Parameter	Type	Required	Default
object_id	integer	yes	
attribute_identifier	string	no	'0'
all_relations	array	no	false

Example

In a template (the values are placeholders of each parameter's type):

Template

```
{def $result = fetch( 'content', 'related_objects_ids', hash( 'object_id', 1 ) )}
{* with every parameter *}
{def $all = fetch( 'content', 'related_objects_ids', hash( 'object_id', 1,
                                                           'attribute_identifier', '0',
                                                           'all_relations', array() ) )}
```

In PHP, the same function through the function handler (`lib/ezutils/classes/ezfunctionhandler.php`):

PHP

```
$result = eZFunctionHandler::execute( 'content', 'related_objects_ids', array( 'object_id' => 1 )
 );
```

In a shipped template

The first use in the templates of this installation, `design/admin/templates/relations.tpl` line 21:

Template

```
{def $related_objects_id_typed = fetch( 'content', 'related_objects_ids', hash( 'object_id', $nod
e.object.id ) )}
```
