fetch('content', 'same_classattribute_node')

The fetch function same_classattribute_node of the content module: 3 parameter(s), 3 required.

Source file: doc/eng-us/examples/fetch-functions/content/same_classattribute_node.md Last changed 2026-11-04
https://doc.exponential.earth/learninminutes/exphelp/viewer/examples/fetch-functions/content/same_classattribute_node.md

Defined in `kernel/content/function_definition.php`; it calls `eZContentFunctionCollection::fetchSameClassAttributeNodeList()` (`kernel/content/ezcontentfunctioncollection.php`). Operation type: read.

Parameters

Parameter	Type	Required	Default
classattribute_id	integer	yes	
value	mixed	yes	
datatype	string	yes	

Example

In a template (the values are placeholders of each parameter's type):

Template

```
{def $result = fetch( 'content', 'same_classattribute_node', hash( 'classattribute_id', 1,
                                                                   'value', $value,
                                                                   'datatype', 'datatype' ) )}
```

In PHP, the same function through the function handler (`lib/ezutils/classes/ezfunctionhandler.php`):

PHP

```
$result = eZFunctionHandler::execute( 'content', 'same_classattribute_node', array( 'classattribute_id' => 1, 'value' => $value, 'datatype' => 'datatype' ) );
```
