The block `[PaginationSettings]` of `settings/admininterface.ini`, with 8 setting(s).

Never edit `settings/admininterface.ini` itself: an update replaces it. Put the settings you change in an override, which wins over the shipped file:

- `settings/override/admininterface.ini.append.php` for every siteaccess,
- `settings/siteaccess/<siteaccess>/admininterface.ini.append.php` for one siteaccess,
- `extension/<extension>/settings/admininterface.ini.append.php` in an extension (read when the extension is active).

DefaultItemsPerPage

> How long the lists in the administration interface are.
>
> One block rather than a setting in each area's own ini file, because the question is "where do I change how long these lists are" and it should have one answer. The key is the module and view that draws the list, so a setting can be found from the address of the page it governs.
>
> Clear the caches after changing these:
> php bin/php/ezcache.php --clear-all
> Used by any list below that names no size of its own.

Default: `25`.

INI

```
<?php /* #?ini charset="utf-8"?
# settings/override/admininterface.ini.append.php
[PaginationSettings]
DefaultItemsPerPage=25
*/ ?>
```

ItemsPerPage

> shop/preferredcurrency is not listed: it is a drop-down for choosing one currency, not a list of rows, and paging it would make it unusable.

Default: a hash of 22: `setup/extensions=25`, `setup/cronjobs=25`, `section/list=25`, `workflow/grouplist=25`, `workflow/processlist=10`, `oauthadmin/list=25`,

`oauthadmin/keys=25`, `package/list=25`, `pdf/list=25`, `content/translations=25`, `infocollector/overview=25`, `class/grouplist=25` ....

INI

```
<?php /* #?ini charset="utf-8"?
# settings/override/admininterface.ini.append.php
[PaginationSettings]
# an empty "ItemsPerPage[]" first replaces the shipped list; without it the items are added

ItemsPerPage[setup/extensions]=25

```

ItemsPerPageList_search_stats

Default: a list of 3: `10`, `25`, `50`.

INI

```
<?php /* #?ini charset="utf-8"?
# settings/override/admininterface.ini.append.php
[PaginationSettings]
# an empty "ItemsPerPageList_search_stats[]" first replaces the shipped list; without it the item

ItemsPerPageList_search_stats[]
ItemsPerPageList_search_stats[]=10
ItemsPerPageList_search_stats[]=25
ItemsPerPageList_search_stats[]=50
*/ ?>
```

ItemsPerPageList_shop_currencylist

> Lists that offer an items per page selector take the sizes they offer. The first is what somebody who has never chosen gets, and the list also bounds the query: a size that is not on it cannot be asked for.

Default: a list of 3: `10`, `25`, `50`.

INI

```
<?php /* #?ini charset="utf-8"?
# settings/override/admininterface.ini.append.php
[PaginationSettings]
# an empty "ItemsPerPageList_shop_currencylist[]" first replaces the shipped list; without it the
 items are added

ItemsPerPageList_shop_currencylist[]=50

INI

```
<?php /* #?ini charset="utf-8"?
# settings/override/admininterface.ini.append.php
[PaginationSettings]
# an empty "ItemsPerPageList_shop_productsoverview[]" first replaces the shipped list; without it

ItemsPerPageList_shop_productsoverview[]=50

the items are added

ItemsPerPageList_workflow_processlist[]=10
ItemsPerPageList_workflow_processlist[]=25
ItemsPerPageList_workflow_processlist[]=50
*/ ?>
```

ItemsPerPageList_setup_session

> Setup > Sessions: the sessions (or, without a session table, the recent sign-ins) shown at once. The first size is the default.

Default: a list of 3: `50`, `25`, `100`.

INI

```
<?php /* #?ini charset="utf-8"?
# settings/override/admininterface.ini.append.php
[PaginationSettings]
# an empty "ItemsPerPageList_setup_session[]" first replaces the shipped list; without it the ite
ms are added
ItemsPerPageList_setup_session[]
ItemsPerPageList_setup_session[]=50
ItemsPerPageList_setup_session[]=25
ItemsPerPageList_setup_session[]=100
*/ ?>
```

ItemsPerPageList_moderation_recent

> choice is remembered (the preference admin_moderation_limit). At most 1000 are shown whatever is set here.

Default: a list of 5: `25`, `100`, `300`, `700`, `1000`.

INI

```
<?php /* #?ini charset="utf-8"?
