The block `[PDFHandlerSettings]` of `settings/binaryfile.ini`, with 1 setting(s).

> The path to the text extraction tool to use to
> fetch the information in PDF files

Never edit `settings/binaryfile.ini` itself: an update replaces it. Put the settings you change in an override, which wins over the shipped file:

- `settings/override/binaryfile.ini.append.php` for every siteaccess,
- `settings/siteaccess/<siteaccess>/binaryfile.ini.append.php` for one siteaccess,
- `extension/<extension>/settings/binaryfile.ini.append.php` in an extension (read when the extension is active).

TextExtractionTool

Default: `pstotext`.

INI

```ini
<?php /* #?ini charset="utf-8"?
# settings/override/binaryfile.ini.append.php
[PDFHandlerSettings]
TextExtractionTool=pstotext
*/ ?>
```
