codetemplate.ini [Files]

The settings of [Files] in codetemplate.ini: Templates, PHPFiles

Source file: doc/eng-us/examples/ini-settings/codetemplate/Files.md Last changed 2026-11-04
https://doc.exponential.earth/learninminutes/exphelp/viewer/examples/ini-settings/codetemplate/Files.md

The block [Files] of settings/codetemplate.ini, with 2 setting(s).

Never edit settings/codetemplate.ini itself: an update replaces it. Put the settings you change in an override, which wins over the shipped file:

- settings/override/codetemplate.ini.append.php for every siteaccess,
- settings/siteaccess/<siteaccess>/codetemplate.ini.append.php for one siteaccess,
- extension/<extension>/settings/codetemplate.ini.append.php in an extension (read when the extension is active).

Templates

Default: a hash of 2: can-instantiate-class-list=templates/classcreatelist.ctpl, class-list-from-policy=templates/classlistfrompolicy.ctpl.

INI

```
<?php /* #?ini charset="utf-8"?
# settings/override/codetemplate.ini.append.php
[Files]
# an empty "Templates[]" first replaces the shipped list; without it the items are added
Templates[]
Templates[can-instantiate-class-list]=templates/classcreatelist.ctpl
Templates[class-list-from-policy]=templates/classlistfrompolicy.ctpl
*/ ?>
```

PHPFiles

Default: a list of 3: kernel/classes/ezcontentclass.php, kernel/classes/ezcontentobject.php, kernel/classes/ezcontentobjecttreenode.php.

INI

```
<?php /* #?ini charset="utf-8"?
# settings/override/codetemplate.ini.append.php
[Files]
# an empty "PHPFiles[]" first replaces the shipped list; without it the items are added
PHPFiles[]
PHPFiles[]=kernel/classes/ezcontentclass.php
PHPFiles[]=kernel/classes/ezcontentobject.php
PHPFiles[]=kernel/classes/ezcontentobjecttreenode.php
*/ ?>
```
