debug.ini [DebugSettings]

The settings of [DebugSettings] in debug.ini: ConditionDebug

Source file: `doc/eng-us/examples/ini-settings/debug/DebugSettings.md` Last changed 2026-11-04
https://doc.exponential.earth/learninminutes/exphelp/viewer/examples/ini-settings/debug/DebugSettings.md

The block `[DebugSettings]` of `settings/debug.ini`, with 1 setting(s).

Never edit `settings/debug.ini` itself: an update replaces it. Put the settings you change in an override, which wins over the shipped file:

- `settings/override/debug.ini.append.php` for every siteaccess,
- `settings/siteaccess/<siteaccess>/debug.ini.append.php` for one siteaccess,
- `extension/<extension>/settings/debug.ini.append.php` in an extension (read when the extension is active).

ConditionDebug

> Master switch for conditional debugging, if disabled
> no conditions are checked.

Default: `enabled`.

INI

```ini
<?php /* #?ini charset="utf-8"?
# settings/override/debug.ini.append.php
[DebugSettings]
ConditionDebug=enabled
*/ ?>
```
