error.ini [HTTPError-302]

The settings of [HTTPError-302] in error.ini: HTTPName, HeaderList

Source file: `doc/eng-us/examples/ini-settings/error/HTTPError-302.md` Last changed 2026-11-06
https://doc.exponential.earth/learninminutes/exphelp/viewer/examples/ini-settings/error/HTTPError-302.md

The block `[HTTPError-302]` of `settings/error.ini`, with 2 setting(s).

> The other statuses a moved page can answer with (since 6.0.15): a temporary URL wildcard (302) and the
> redirects of exp_url_redirect, which keep the status of the URL map they were imported from. Without the
> group of a status, such a redirect answers with 301.

Never edit `settings/error.ini` itself: an update replaces it. Put the settings you change in an override, which wins over the shipped file:

- `settings/override/error.ini.append.php` for every siteaccess,
- `settings/siteaccess/<siteaccess>/error.ini.append.php` for one siteaccess,
- `extension/<extension>/settings/error.ini.append.php` in an extension (read when the extension is active).

HTTPName

Default: `Found`.

INI

```
<?php /* #?ini charset="utf-8"?
# settings/override/error.ini.append.php
[HTTPError-302]
HTTPName=Found
*/ ?>
```

HeaderList

Default: an empty list.

INI

```
<?php /* #?ini charset="utf-8"?
# settings/override/error.ini.append.php
[HTTPError-302]
# an empty "HeaderList[]" first replaces the shipped list; without it the items are added
HeaderList[]
*/ ?>
```
