# graphql.ini [GraphQLNaming]

The settings of [GraphQLNaming] in graphql.ini: TypeNames, FieldNames

Source file: `doc/eng-us/examples/ini-settings/graphql/GraphQLNaming.md` Last changed 2026-11-04
https://doc.exponential.earth/learninminutes/exphelp/viewer/examples/ini-settings/graphql/GraphQLNaming.md

The block `[GraphQLNaming]` of `settings/graphql.ini`, with 2 setting(s).

Never edit `settings/graphql.ini` itself: an update replaces it. Put the settings you change in an override, which wins over the shipped file:

- `settings/override/graphql.ini.append.php` for every siteaccess,
- `settings/siteaccess/<siteaccess>/graphql.ini.append.php` for one siteaccess,
- `extension/<extension>/settings/graphql.ini.append.php` in an extension (read when the extension is active).

## TypeNames

> NamingStyle=map: the name of a type per class identifier, and of a field per <class>/<attribute>.
> TypeNames[ng_article]=Article
> FieldNames[ng_article/short_title]=shortTitle

Default: an empty list.

**INI**

```ini
<?php /* #?ini charset="utf-8"?
# settings/override/graphql.ini.append.php
[GraphQLNaming]
# an empty "TypeNames[]" first replaces the shipped list; without it the items are added
TypeNames[]
*/ ?>
```

## FieldNames

Default: an empty list.

**INI**

```ini
<?php /* #?ini charset="utf-8"?
# settings/override/graphql.ini.append.php
[GraphQLNaming]
# an empty "FieldNames[]" first replaces the shipped list; without it the items are added
FieldNames[]
*/ ?>
```
