querycache.ini [DebugSettings]

The settings of [DebugSettings] in querycache.ini: Report

Source file: `doc/eng-us/examples/ini-settings/querycache/DebugSettings.md` Last changed 2026-11-04
https://doc.exponential.earth/learninminutes/exphelp/viewer/examples/ini-settings/querycache/DebugSettings.md

The block `[DebugSettings]` of `settings/querycache.ini`, with 1 setting(s).

Never edit `settings/querycache.ini` itself: an update replaces it. Put the settings you change in an override, which wins over the shipped file:

- `settings/override/querycache.ini.append.php` for every siteaccess,
- `settings/siteaccess/<siteaccess>/querycache.ini.append.php` for one siteaccess,
- `extension/<extension>/settings/querycache.ini.append.php` in an extension (read when the extension is active).

Report

> With the debug output on: accumulators of the group "Query cache" (hits, misses, stores, statements not cached), a timing point when the state is read, and a report at the bottom with this request's counters, the database time the hits saved, why statements were not cached and which writes made everything stale. enabled | disabled

Default: `enabled`.

INI

```
<?php /* #?ini charset="utf-8"?
# settings/override/querycache.ini.append.php
[DebugSettings]
Report=enabled
*/ ?>
```
