requestrules.ini

The blocks and settings of requestrules.ini.

Source file: `doc/eng-us/examples/ini-settings/requestrules/README.md` Last changed 2026-11-04
https://doc.exponential.earth/learninminutes/exphelp/viewer/examples/ini-settings/requestrules/README.md

The shipped settings of `settings/requestrules.ini`: 4 blocks, 19 settings.

> Request rules: what happens to a request before its module view runs.
>
> Guide with every condition, action and fact, and recipes:
> doc/eng-us/bc/6.0/view_full_security.md
>
> A rule is a group [Rule-<name>] with conditions and an action. The rules named in RuleList[] are asked in that order about every module view the kernel is about to run -- after the URL alias is translated and after the user's role policies allowed the view. The first rule whose conditions all match decides; when none does, the request runs as it always has.
>
> Rules only ever take access away or send the visitor elsewhere. They never give access that a policy refused.
>
> Do not edit this file. Override it in
> settings/override/requestrules.ini.append.php every siteaccess
> settings/siteaccess/<name>/requestrules.ini.append.php one siteaccess
> extension/<name>/settings/requestrules.ini.append.php from an extension
>
> Check the settings and see what the rules decide for any address with
> php bin/php/ezrequestrules.php -s <siteaccess> --check
> php bin/php/ezrequestrules.php -s <siteaccess> --uri=content/view/full/2

Block	Settings
RequestRuleSettings	7
Rule-system_url_full_view_to_alias	5
Rule-system_url_content_view_notfound	3
Rule-system_url_full_view_audit	4
