transform.ini [lowercase]

The settings of [lowercase] in transform.ini: Files, Extensions, Commands

Source file: doc/eng-us/examples/ini-settings/transform/lowercase.md Last changed 2026-11-04
https://doc.exponential.earth/learninminutes/exphelp/viewer/examples/ini-settings/transform/lowercase.md

The block `[lowercase]` of `settings/transform.ini`, with 3 setting(s).

> Rules which makes character into lowercase
> These rules works in similar way to strtolower in PHP but will
> work regardless of locale used.

Never edit `settings/transform.ini` itself: an update replaces it. Put the settings you change in an override, which wins over the shipped file:

- `settings/override/transform.ini.append.php` for every siteaccess,
- `settings/siteaccess/<siteaccess>/transform.ini.append.php` for one siteaccess,
- `extension/<extension>/settings/transform.ini.append.php` in an extension (read when the extension is active).

Files

> Extra transformation files for identifiers

Default: an empty list.

INI

```
<?php /* #?ini charset="utf-8"?
# settings/override/transform.ini.append.php
[lowercase]
# an empty "Files[]" first replaces the shipped list; without it the items are added
Files[]
*/ ?>
```

Extensions

> Extensions that have transformation files when identifiers are used

Default: an empty list.

INI

```
<?php /* #?ini charset="utf-8"?
# settings/override/transform.ini.append.php
[lowercase]
# an empty "Extensions[]" first replaces the shipped list; without it the items are added
Extensions[]
*/ ?>
```

Commands

> The commands to use for identifiers

Default: a list of 1: `lowercase`.

INI

```ini
<?php /* #?ini charset="utf-8"?
# settings/override/transform.ini.append.php
[lowercase]
# an empty "Commands[]" first replaces the shipped list; without it the items are added
Commands[]
Commands[]=lowercase
*/ ?>
```
