/collaboration/view

The view collaboration/view: its address, parameters and the policy functions it needs.

Source file: doc/eng-us/examples/module-views/collaboration/view.md Last changed 2026-11-04
https://doc.exponential.earth/learninminutes/exphelp/viewer/examples/module-views/collaboration/view.md

A view of the `collaboration` module, defined in `kernel/collaboration/module.php` and run by `kernel/collaboration/view.php`.

Address

```
/collaboration/view/<ViewMode>/(language)/<Language>/(offset)/<Offset>/(status)/<Status>/(role)/<Role>/(type)/<Type>/(group)/<Group>
```

Ordered parameters, in this order after the view name: `ViewMode`.

Unordered parameters, in any order as `/(name)/value`: `(language)` sets `Language`, `(offset)` sets `Offset`, `(status)` sets `Status`, `(role)` sets `Role`, `(type)` sets `Type`, `(group)` sets `Group`.

Who may open it

The view names no policy function, so the user needs a policy for the whole module: `collaboration/*` (every function of the module) in one of the roles assigned to them.

Details

Key	Value
Navigation part	`ezmynavigationpart`

Example

A link in a template (`ezurl` adds the siteaccess and quotes the address); the parameter values are placeholders:

Template

```
<a href={'/collaboration/view/viewmode'|ezurl}>collaboration/view</a>
<a href={concat( '/collaboration/view/viewmode/(language)/', 1 )|ezurl}>collaboration/view</a>
```

From PHP, the redirect a view gives after it has done its work:

PHP

```
return $Module->redirectTo( '/collaboration/view/viewmode' );
```
