/content/removeeditversion

The view content/removeeditversion: its address, parameters and the policy functions it needs.

Source file: doc/eng-us/examples/module-views/content/removeeditversion.md Last changed 2026-11-04
https://doc.exponential.earth/learninminutes/exphelp/viewer/examples/module-views/content/removeeditversion.md

A view of the `content` module, defined in `kernel/content/module.php` and run by `kernel/content/removeeditversion.php`.

Address

```
/content/removeeditversion
```

Who may open it

The user needs this policy function:

- `content/read`

A policy on `content/*` (every function) also grants it; limitations of the policy (section, subtree, class ...) still apply where the view checks them.

Details

Key	Value
Navigation part	ezcontentnavigationpart
UI context	edit

Example

A link in a template (`ezurl` adds the siteaccess and quotes the address); the parameter values are placeholders:

Template

```
<a href={'/content/removeeditversion'|ezurl}>content/removeeditversion</a>
```

From PHP, the redirect a view gives after it has done its work:

PHP

```
return $Module->redirectTo( '/content/removeeditversion' );
```
