/contentcheck/storageaction

The view contentcheck/storageaction: its address, parameters and the policy functions it needs.

Source file: doc/eng-us/examples/module-views/contentcheck/storageaction.md Last changed 2026-11-04
https://doc.exponential.earth/learninminutes/exphelp/viewer/examples/module-views/contentcheck/storageaction.md

A view of the `contentcheck` module, defined in `kernel/contentcheck/module.php` and run by `kernel/contentcheck/storageaction.php`.

Address

```
/contentcheck/storageaction
```

Who may open it

The user needs this policy function:

- `contentcheck/storage`

A policy on `contentcheck/*` (every function) also grants it; limitations of the policy (section, subtree, class ...) still apply where the view checks them.

Details

Key	Value
Navigation part	`ezsetupnavigationpart`

Example

A link in a template (`ezurl` adds the siteaccess and quotes the address); the parameter values are placeholders:

Template

```
<a href={'/contentcheck/storageaction'|ezurl}>contentcheck/storageaction</a>
```

From PHP, the redirect a view gives after it has done its work:

PHP

```
return $Module->redirectTo( '/contentcheck/storageaction' );
```
