/mailpreferences/admin

The view mailpreferences/admin: its address, parameters and the policy functions it needs.

Source file: doc/eng-us/examples/module-views/mailpreferences/admin.md Last changed 2026-11-04
https://doc.exponential.earth/learninminutes/exphelp/viewer/examples/module-views/mailpreferences/admin.md

A view of the `mailpreferences` module, defined in `kernel/mailpreferences/module.php` and run by `kernel/mailpreferences/admin.php`.

Address

```
/mailpreferences/admin/<Page>/<ID>/(offset)/<Offset>/(export)/<Export>/(person)/<Person>/(categor
y)/<Category>/(source)/<Source>/(from)/<From>/(to)/<To>/(q)/<Q>
```

Ordered parameters, in this order after the view name: `Page`, `ID`.

Unordered parameters, in any order as `/(name)/value`: `(offset)` sets `Offset`, `(export)` sets `Export`, `(person)` sets `Person`, `(category)` sets `Category`, `(source)` sets `Source`, `(from)` sets `From`, `(to)` sets `To`, `(q)` sets `Q`.

Who may open it

The user needs this policy function:

- `mailpreferences/administrate`

A policy on `mailpreferences/*` (every function) also grants it; limitations of the policy (section, subtree, class ...) still apply where the view checks them.

Details

Key	Value
Navigation part	`ezsetupnavigationpart`
UI context	`administration`

Example

A link in a template (`ezurl` adds the siteaccess and quotes the address); the parameter values are placeholders:

Template

```
<a href={'/mailpreferences/admin/page/1'|ezurl}>mailpreferences/admin</a>
<a href={concat( '/mailpreferences/admin/page/1/(offset)/', 1 )|ezurl}>mailpreferences/admin</a>
```

From PHP, the redirect a view gives after it has done its work:

PHP

```php
return $Module->redirectTo( '/mailpreferences/admin/page/1' );
```
