# /migration/deployment

The view migration/deployment: its address, parameters and the policy functions it needs.

Source file: doc/eng-us/examples/module-views/migration/deployment.md Last changed 2026-11-04
https://doc.exponential.earth/learninminutes/exphelp/viewer/examples/module-views/migration/deployment.md

A view of the `migration` module, defined in `kernel/migration/module.php` and run by `kernel/migration/deployment.php`.

## Address

```
/migration/deployment/<DeployID>
```

Ordered parameters, in this order after the view name: `DeployID`.

## Who may open it

The user needs this policy function:

- `migration/read`

A policy on `migration/*` (every function) also grants it; limitations of the policy (section, subtree, class ...) still apply where the view checks them.

## Details

| Key | Value |
|---|---|
| Navigation part | `ezsetupnavigationpart` |
| Single POST actions | ApproveButton: Approve, RollbackButton: Rollback |

## Example

A link in a template (`ezurl` adds the siteaccess and quotes the address); the parameter values are placeholders:

**Template**

```
<a href={'/migration/deployment/1'|ezurl}>migration/deployment</a>
```

From PHP, the redirect a view gives after it has done its work:

**PHP**

```
return $Module->redirectTo( '/migration/deployment/1' );
```
