/moderation/recent

The view moderation/recent: its address, parameters and the policy functions it needs.

Source file: doc/eng-us/examples/module-views/moderation/recent.md Last changed 2026-11-04
https://doc.exponential.earth/learninminutes/exphelp/viewer/examples/module-views/moderation/recent.md

A view of the `moderation` module, defined in `kernel/moderation/module.php` and run by `kernel/moderation/recent.php`.

Address

```
/moderation/recent/(from)/<From>/(to)/<To>/(date)/<Date>/(class)/<Class>/(status)/<Status>/(hidden)/<Hidden>/(held)/<Held>/(section)/<Section>/(siteaccess)/<Siteaccess>/(creator)/<Creator>/(sort)/<Sort>/(order)/<Order>/(offset)/<Offset>
```

Unordered parameters, in any order as `/(name)/value`: `(from)` sets `From`, `(to)` sets `To`, `(date)` sets `Date`, `(class)` sets `Class`, `(status)` sets `Status`, `(hidden)` sets `Hidden`, `(held)` sets `Held`, `(section)` sets `Section`, `(siteaccess)` sets `Siteaccess`, `(creator)` sets `Creator`, `(sort)` sets `Sort`, `(order)` sets `Order`, `(offset)` sets `Offset`.

Who may open it

The user needs this policy function:

- `moderation/read`

A policy on `moderation/*` (every function) also grants it; limitations of the policy (section, subtree, class ...) still apply where the view checks them.

Details

Key	Value
Navigation part	`ezmynavigationpart`

Example

A link in a template (`ezurl` adds the siteaccess and quotes the address); the parameter values are placeholders:

Template

```
<a href={'/moderation/recent'|ezurl}>moderation/recent</a>
<a href={concat( '/moderation/recent/(from)/', 1 )|ezurl}>moderation/recent</a>
```

From PHP, the redirect a view gives after it has done its work:

PHP

```
return $Module->redirectTo( '/moderation/recent' );
```
