/notification/status

The view notification/status: its address, parameters and the policy functions it needs.

Source file: doc/eng-us/examples/module-views/notification/status.md Last changed 2026-11-04
https://doc.exponential.earth/learninminutes/exphelp/viewer/examples/module-views/notification/status.md

A view of the `notification` module, defined in `kernel/notification/module.php` and run by `kernel/notification/status.php`.

Address

```
/notification/status
```

Who may open it

The user needs this policy function:

- `notification/administrate`

A policy on `notification/*` (every function) also grants it; limitations of the policy (section, subtree, class ...) still apply where the view checks them.

Details

Key	Value
Navigation part	`ezsetupnavigationpart`
UI context	`administration`

Example

A link in a template (`ezurl` adds the siteaccess and quotes the address); the parameter values are placeholders:

Template

```
<a href={'/notification/status'|ezurl}>notification/status</a>
```

From PHP, the redirect a view gives after it has done its work:

PHP

```
return $Module->redirectTo( '/notification/status' );
```
