/package/install

The view package/install: its address, parameters and the policy functions it needs.

Source file: doc/eng-us/examples/module-views/package/install.md Last changed 2026-11-04
https://doc.exponential.earth/learninminutes/exphelp/viewer/examples/module-views/package/install.md

A view of the package module, defined in kernel/package/module.php and run by kernel/package/install.php.

Address

```
/package/install/<PackageName>
```

Ordered parameters, in this order after the view name: PackageName.

Who may open it

The user needs this policy function:

- package/install

A policy on package/* (every function) also grants it; limitations of the policy (section, subtree, class ...) still apply where the view checks them.

Details

Key	Value
Navigation part	ezsetupnavigationpart
UI context	edit
Single POST actions	HandleError: HandleError, InstallPackageButton: InstallPackage, PackageStep: PackageStep, SkipPackageButton: SkipPackage
POST action parameters	InstallPackage (InstallerType: InstallerType, AsDrafts: AsDrafts, DraftsExisting: DraftsExisting, Background: Background), PackageStep (InstallerType: InstallerType, InstallStepID: InstallStepID, PreviousStep: PreviousStepButton, NextStep: NextStepButton), HandleError (ActionID: ActionID, RememberAction: RememberAction)

Example

A link in a template (ezurl adds the siteaccess and quotes the address); the parameter values are placeholders:

Template

```
<a href={'/package/install/packagename'|ezurl}>package/install</a>
```

From PHP, the redirect a view gives after it has done its work:

PHP

```php
return $Module->redirectTo( '/package/install/packagename' );
```
