/package/list

The view package/list: its address, parameters and the policy functions it needs.

Source file: doc/eng-us/examples/module-views/package/list.md Last changed 2026-11-04
https://doc.exponential.earth/learninminutes/exphelp/viewer/examples/module-views/package/list.md

A view of the package module, defined in kernel/package/module.php and run by kernel/package/list.php.

Address

```
/package/list/<RepositoryID>/(offset)/<Offset>/(search)/<Search>/(type)/<Type>/(state)/<State>/(sort)/<Sort>/(dir)/<Dir>
```

Ordered parameters, in this order after the view name: RepositoryID.

Unordered parameters, in any order as /(name)/value: (offset) sets Offset, (search) sets Search, (type) sets Type, (state) sets State, (sort) sets Sort, (dir) sets Dir.

Who may open it

The user needs this policy function:

- package/list

A policy on package/* (every function) also grants it; limitations of the policy (section, subtree, class ...) still apply where the view checks them.

Details

Key	Value
Navigation part	ezsetupnavigationpart
Single POST actions	ChangeRepositoryButton: ChangeRepository, InstallPackageButton: InstallPackage, RemovePackageButton: RemovePackage, ConfirmRemovePackageButton: ConfirmRemovePackage, CancelRemovePackageButton: CancelRemovePackage, CreatePackageButton: CreatePackage
POST action parameters	ChangeRepository (RepositoryID: RepositoryID), RemovePackage (PackageSelection: PackageSelection), ConfirmRemovePackage (PackageSelection: PackageSelection)

Example

A link in a template (ezurl adds the siteaccess and quotes the address); the parameter values are placeholders:

Template

```
<a href={'/package/list/1'|ezurl}>package/list</a>
<a href={concat( '/package/list/1/(offset)/', 1 )|ezurl}>package/list</a>
```

From PHP, the redirect a view gives after it has done its work:

PHP

```php
return $Module->redirectTo( '/package/list/1' );
```
