/rss/edit_import

The view rss/edit_import: its address, parameters and the policy functions it needs.

Source file: doc/eng-us/examples/module-views/rss/edit_import.md Last changed 2026-11-04
https://doc.exponential.earth/learninminutes/exphelp/viewer/examples/module-views/rss/edit_import.md

A view of the `rss` module, defined in `kernel/rss/module.php` and run by `kernel/rss/edit_import.php`.

Address

```
/rss/edit_import/<RSSImportID>/<BrowseType>
```

Ordered parameters, in this order after the view name: `RSSImportID`, `BrowseType`.

Who may open it

The user needs this policy function:

- `rss/edit`

A policy on `rss/*` (every function) also grants it; limitations of the policy (section, subtree, class ...) still apply where the view checks them.

Details

Key	Value
Navigation part	`ezsetupnavigationpart`
UI context	`edit`
Single POST actions	StoreButton: Store, RemoveButton: Cancel, AnalyzeFeedButton: AnalyzeFeed, Update_Class: UpdateClass, DestinationBrowse: BrowseDestination, UserBrowse: BrowseUser

Example

A link in a template (`ezurl` adds the siteaccess and quotes the address); the parameter values are placeholders:

Template

```
<a href={'/rss/edit_import/1/browsetype'|ezurl}>rss/edit_import</a>
```

From PHP, the redirect a view gives after it has done its work:

PHP

```
return $Module->redirectTo( '/rss/edit_import/1/browsetype' );
```
