/settings/edit

The view settings/edit: its address, parameters and the policy functions it needs.

Source file: doc/eng-us/examples/module-views/settings/edit.md Last changed 2026-11-04
https://doc.exponential.earth/learninminutes/exphelp/viewer/examples/module-views/settings/edit.md

A view of the `settings` module, defined in `kernel/settings/module.php` and run by `kernel/settings/edit.php`.

Address

```
/settings/edit/<SiteAccess>/<INIFile>/<Block>/<Setting>/<Placement>
```

Ordered parameters, in this order after the view name: `SiteAccess`, `INIFile`, `Block`, `Setting`, `Placement`.

Who may open it

The view names no policy function, so the user needs a policy for the whole module: `settings/*` (every function of the module) in one of the roles assigned to them.

Details

Key	Value
Navigation part	ezsetupnavigationpart
UI context	edit

Example

A link in a template (`ezurl` adds the siteaccess and quotes the address); the parameter values are placeholders:

Template

```
<a href={'/settings/edit/siteaccess/inifile/block/setting/placement'|ezurl}>settings/edit</a>
```

From PHP, the redirect a view gives after it has done its work:

PHP

```
return $Module->redirectTo( '/settings/edit/siteaccess/inifile/block/setting/placement' );
```
