/visual/templatecreate

The view visual/templatecreate: its address, parameters and the policy functions it needs.

Source file: doc/eng-us/examples/module-views/visual/templatecreate.md Last changed 2026-11-04
https://doc.exponential.earth/learninminutes/exphelp/viewer/examples/module-views/visual/templatecreate.md

A view of the `visual` module, defined in `kernel/visual/module.php` and run by `kernel/visual/templatecreate.php`.

Address

```
/visual/templatecreate/(siteAccess)/<SiteAccess>/(classID)/<ClassID>/(nodeID)/<NodeID>/(objectID)
/<ObjectID>
```

Unordered parameters, in any order as `/(name)/value`: `(siteAccess)` sets `SiteAccess`, `(classID)` sets `ClassID`, `(nodeID)` sets `NodeID`, `(objectID)` sets `ObjectID`.

Who may open it

The view names no policy function, so the user needs a policy for the whole module: `visual/*` (every function of the module) in one of the roles assigned to them.

Details

Key	Value
Navigation part	ezvisualnavigationpart
Single POST actions	CreateOverrideButton: CreateOverride, CancelOverrideButton: CancelOverride

Example

A link in a template (`ezurl` adds the siteaccess and quotes the address); the parameter values are placeholders:

Template

```
<a href={'/visual/templatecreate'|ezurl}>visual/templatecreate</a>
<a href={concat( '/visual/templatecreate/(siteAccess)/', 1 )|ezurl}>visual/templatecreate</a>
```

From PHP, the redirect a view gives after it has done its work:

PHP

```
return $Module->redirectTo( '/visual/templatecreate' );
```
