# /workflow/edit

The view workflow/edit: its address, parameters and the policy functions it needs.

Source file: doc/eng-us/examples/module-views/workflow/edit.md Last changed 2026-11-04
https://doc.exponential.earth/learninminutes/exphelp/viewer/examples/module-views/workflow/edit.md

A view of the `workflow` module, defined in `kernel/workflow/module.php` and run by `kernel/workflow/edit.php`.

## Address

```
/workflow/edit/<WorkflowID>/<GroupID>/<GroupName>
```

Ordered parameters, in this order after the view name: `WorkflowID`, `GroupID`, `GroupName`.

## Who may open it

The view names no policy function, so the user needs a policy for the whole module: `workflow/*` (every function of the module) in one of the roles assigned to them.

## Details

| Key | Value |
|---|---|
| Navigation part | ezsetupnavigationpart |
| UI context | edit |

## Example

A link in a template (`ezurl` adds the siteaccess and quotes the address); the parameter values are placeholders:

**Template**

```
<a href={'/workflow/edit/1/1/groupname'|ezurl}>workflow/edit</a>
```

From PHP, the redirect a view gives after it has done its work:

**PHP**

```
return $Module->redirectTo( '/workflow/edit/1/1/groupname' );
```
