/workflow/processlist

The view workflow/processlist: its address, parameters and the policy functions it needs.

Source file: doc/eng-us/examples/module-views/workflow/processlist.md Last changed 2026-11-04
https://doc.exponential.earth/learninminutes/exphelp/viewer/examples/module-views/workflow/processlist.md

A view of the `workflow` module, defined in `kernel/workflow/module.php` and run by `kernel/workflow/processlist.php`.

Address

```
/workflow/processlist/(offset)/<Offset>/(status)/<Status>
```

Unordered parameters, in any order as `/(name)/value`: `(offset)` sets `Offset`, `(status)` sets `Status`.

Who may open it

The view names no policy function, so the user needs a policy for the whole module: `workflow/*` (every function of the module) in one of the roles assigned to them.

Details

Key	Value
Navigation part	ezsetupnavigationpart

Example

A link in a template (`ezurl` adds the siteaccess and quotes the address); the parameter values are placeholders:

Template

```
<a href={'/workflow/processlist'|ezurl}>workflow/processlist</a>
<a href={concat( '/workflow/processlist/(offset)/', 1 )|ezurl}>workflow/processlist</a>
```

From PHP, the redirect a view gives after it has done its work:

PHP

```
return $Module->redirectTo( '/workflow/processlist' );
```
