currentdate template operator

The currentdate template operator: no named parameters, registered by eZTemplateLocaleOperator.

Source file: doc/eng-us/examples/template-operators/currentdate.md Last changed 2026-11-04
https://doc.exponential.earth/learninminutes/exphelp/viewer/examples/template-operators/currentdate.md

The currentdate template operator

Registered in `lib/eztemplate/classes/eztemplateautoload.php` by the class `eZTemplateLocaleOperator` (`lib/eztemplate/classes/eztemplatelocaleoperator.php`). The same class also registers: l10n, locale, datetime, maketime, makedate, gettime.

Parameters

None.

The operator takes no input: it is called on its own, not after `|`.

Example

Built from the parameter list above; the values are placeholders (the operator's template hints decide whether it takes an input).

Template

```
{currentdate}
```

In a shipped template

The first use in the templates of this installation, `design/admin/templates/content/collectedinfo/poll.tpl` line 7:

Template

```
<h2><span class="time">[{currentdate()|l10n( shortdatetime )}]</span> {'Anonymous users are not a
llowed to vote in this poll. Please log in.'|i18n('design/admin/content/collectedinfo/poll')}</h2
>
```
