div template operator

The div template operator: no named parameters, registered by eZTemplateArithmeticOperator.

Source file: `doc/eng-us/examples/template-operators/div.md` Last changed 2026-11-04
https://doc.exponential.earth/learninminutes/exphelp/viewer/examples/template-operators/div.md

The div template operator

Registered in `lib/eztemplate/classes/eztemplateautoload.php` by the class `eZTemplateArithmeticOperator` (`lib/eztemplate/classes/eztemplatearithmeticoperator.php`). The same class also registers: sum, sub, inc, dec, mod, mul, max, min, abs, ceil, floor, round, int, float, count, roman , rand.

Parameters

None.

The operator works on its input: the value before `|`.

Example

Built from the parameter list above; the values are placeholders (the operator's template hints decide whether it takes an input).

Template

```
{$value|div}
```

In a shipped template

The first use in the templates of this installation, `design/admin/templates/class/datatype_list.tpl` line 22:

Template

```
<span class="a4-meta">{'Counted %time, again after %minutes minutes'|i18n( 'design/admin/class/datatype',, hash( '%time', $datatype_counted|l10n( shortdatetime ), '%minutes', div( $datatype_cache_ttl, 60 )|floor ) )|wash}</span>
```
