ezini_hasvariable template operator

The ezini_hasvariable template operator: 2 parameter(s), registered by eZURLOperator.

Source file: doc/eng-us/examples/template-operators/ezini_hasvariable.md Last changed 2026-11-04
https://doc.exponential.earth/learninminutes/exphelp/viewer/examples/template-operators/ezini_hasvariable.md

The ezini_hasvariable template operator

Registered in `kernel/common/eztemplateautoload.php` by the class `eZURLOperator` (`kernel/common/ezurloperator.php`). The same class also registers: ezurl, ezroot, ezdesign, ezimage, exturl, ezsys, ezhttp, ezhttp_hasvariable, ezini.

Parameters

Parameter	Type	Required	Default
quote_val	string	no	'double'
server_url	string	no	'relative'

The operator works on its input: the value before `|`.

Example

Built from the parameter list above; the values are placeholders (the operator's template hints decide whether it takes an input).

Template

```
{$value|ezini_hasvariable( 'double', 'relative' )}
```

In a shipped template

The first use in the templates of this installation, `design/admin/templates/children_detailed.tpl` line 54:

Template

```
subitemsServer: {if ezini_hasvariable( 'ezjscServer_expsubitems', 'Class', 'ezjscore.ini' )}true{
else}false{/if},
```
