ezroot template operator

The ezroot template operator: 2 parameter(s), registered by eZURLOperator.

Source file: `doc/eng-us/examples/template-operators/ezroot.md` Last changed 2026-11-04
https://doc.exponential.earth/learninminutes/exphelp/viewer/examples/template-operators/ezroot.md

The ezroot template operator

Registered in `kernel/common/eztemplateautoload.php` by the class `eZURLOperator` (`kernel/common/ezurloperator.php`). The same class also registers: ezurl, ezdesign, ezimage, exturl, ezsys, ezhttp, ezhttp_hasvariable, ezini, ezini_hasvariable.

Parameters

Parameter	Type	Required	Default
quote_val	string	no	'double'
server_url	string	no	'relative'

The operator works on its input: the value before `|`.

Example

Built from the parameter list above; the values are placeholders (the operator's template hints decide whether it takes an input).

Template

```
{$value|ezroot( 'double', 'relative' )}
```

In a shipped template

The first use in the templates of this installation, `design/admin/override/templates/embed-inline_image.tpl` line 8:

Template

```
<img src={$image_variation.full_path|ezroot} alt="{$object.data_map.image.content.alternative_text|wash(xhtml)}"
```
