is_null template operator

The is_null template operator: no named parameters, registered by eZTemplateTypeOperator.

Source file: doc/eng-us/examples/template-operators/is_null.md Last changed 2026-11-04
https://doc.exponential.earth/learninminutes/exphelp/viewer/examples/template-operators/is_null.md

The is_null template operator

Registered in `lib/eztemplate/classes/eztemplateautoload.php` by the class `eZTemplateTypeOperator` (`lib/eztemplate/classes/eztemplatetypeoperator.php`). The same class also registers: is_array, is_boolean, is_integer, is_float, is_numeric, is_string, is_object, is_class, is_set, is_unset, get_type, get_class.

Parameters

None.

The operator works on its input: the value before `|`.

Example

Built from the parameter list above; the values are placeholders (the operator's template hints decide whether it takes an input).

Template

```
{$value|is_null}
```

In a shipped template

The first use in the templates of this installation, `design/admin/templates/audit/dashboard.tpl` line 41:

Template

```
<p class="a4-audit-sub">{'Signing key %id, fingerprint %fp'|i18n( 'design/admin/audit',, hash( '%
id', $health.key.id, '%fp', $health.key.fingerprint ) )|wash}{if is_null( $health.key.age_days )|
not}, {'%n days old'|i18n( 'design/admin/audit',, hash( '%n', $health.key.age_days ) )}{/if}</p>
```
