lt template operator

The lt template operator: 1 parameter(s), registered by eZTemplateLogicOperator.

Source file: doc/eng-us/examples/template-operators/lt.md Last changed 2026-11-04
https://doc.exponential.earth/learninminutes/exphelp/viewer/examples/template-operators/lt.md

The lt template operator

Registered in `lib/eztemplate/classes/eztemplateautoload.php` by the class `eZTemplateLogicOperator` (`lib/eztemplate/classes/eztemplatelogicoperator.php`). The same class also registers: gt, le, ge, eq, ne, null, not, true, false, or, and, choose.

Parameters

Parameter	Type	Required	Default
threshold	mixed	yes	false

The operator works on its input: the value before `|`.

Example

Built from the parameter list above; the values are placeholders (the operator's template hints decide whether it takes an input).

Template

```
{$value|lt( $threshold )}
```

In a shipped template

The first use in the templates of this installation, `design/admin/templates/content/jobs.tpl` line 100:

Template

```
{if lt( sum( $offset, $page ), $count )}<a href={concat( $page_url, '/(offset)/', sum( $offset, $page ) )|ezurl}>{'Older'|i18n( 'design/admin/content/job' )}</a>{/if}
```
